  - Used as a child seat

**What is ISO FIX?**
ISO FIX is a standardized fixed method of child seat by ISO (International Organization of Standardization). This standardization is intended to help prevent improper use, improve vehicle compatibility and ensure global unification of the mounting method.

The advantages of ISO FIX are easy and secure mounting, which improve safety.

To mount using ISO FIX, please note that there are constraints for different vehicles. Please consult your dealer for details.

**Advice on how to choose a child seat**
There are 3 types of child seats: "Baby Seat" for infants, "Child Seat" for small children and "Junior Seat" for school children. Check your child's weight, age and your vehicle's mounting method to choose the best seat.
